

CMPT 276 – Group Project Meeting Notes

Meeting #2

Date: February 5, 2026

Attendees: Jack, Yuvraj, Gurneet, Isirak

Meeting Notes:

- I. Overview of project structure
 - a. Looked at intro on GitHub
- II. Discussed workload
 - a. Backend: Jack, Gurneet
 - i. System of converting md files to problem statements
 - 1. Doing a lot of OOP
 - ii. Authentication system (user can create accounts) – they have access to the local database
 - b. Frontend: Yuvraj, Isirak
 - i. Create a low-fidelity wireframe: Designing UI structure for the website (Figma, Balsamiq, etc.)
 - ii. Implementing static templates (HTML pages)
- III. Features:
 - a. Half of page will contain a “problem statement”
 - 1. Need to have a system of converting Markdown files into HTML DOM components
 - b. Other half of page will contain a code editor
 - 1. Input field: Proper syntax highlighting for programming languages
- IV. Functionalities:
 - a. Being able to create “workspaces”
 - b. Being able to remove “workspaces”
 - c. Study system
 - i. App is going to show you 4-5 workspaces, with a confirmation button to allow users to view code snippets that they have already saved
 - ii. Have 2 buttons to “rank” problems
 - 1. Good
 - 2. Hard

To Do:

- Research Figma + any other wireframe ideation tools

Next Meeting:

- Create wireframe for website
